EDUCATION

Computer Engineering

National University of Tucumán

2021 – Mar 2026

GPA: 8.93/10. **#1 in Computer Engineering** and ranked 6th across the Faculty of Exact Sciences and Technology. **Completed 100% of coursework (43/43 courses)**. Dean's List honoree and selected as National Flag Bearer.

High School Diploma

Colegio Pablo Apóstol

2015 – 2020

Top of class for six consecutive years. **National Flag Bearer** for academic excellence.

SKILLS

C# · TypeScript · JavaScript · React · SQL · ASP.NET · .NET · REST API · Azure OpenAI · Azure · Azure DevOps · CI/CD · Git · Playwright · Python · MySQL · PostgreSQL · NestJS · Socket.io · PWA · HTML · CSS · Agile · Scrum

About

Software Engineer and Computer Engineering graduate from UNT with a **GPA of 8.93/10**, **ranking #1 in the program**. Graduated March 2026. Specialized in **full-stack development** with **React**, **TypeScript**, **C#**, **ASP.NET**, and **SQL**. Currently at **Sovos**, focused on strategic **generative AI integration (Azure OpenAI)** and process automation. Experienced in **cloud infrastructure (Azure)**, **CI/CD**, environment management, and hands-on **Disaster Recovery** implementation.

Experience

Software Engineer I

Oct 2024 – Present

Sovos

- Building scalable **full-stack** solutions using **React**, **TypeScript**, **JavaScript**, **C#**, **ASP.NET**, and **SQL** for high-performance applications.
- Designing and configuring **cloud infrastructure** on **Azure** across multiple environments (development, staging, production).
- Integrating **Azure OpenAI** and developing **REST APIs** to automate business processes.
- Implementing **CI/CD pipelines** with **Azure DevOps** and **Git** for automated deployments.
- Created pipelines using **Devin** to automate **PR Review** processes and enhance code quality.
- Implemented automated dependency and library updates through automation pipelines.
- Leveraging **generative AI tools**: Cursor, Devin, and GitHub Copilot to accelerate development velocity.
- Managing **SQL databases** and optimizing queries to improve application performance.

Software Development Intern

Jun 2024 – Oct 2024

Sovos

- Developed new features in **React** (frontend) and **C#/ASP.NET** (backend), resolving critical bugs in core projects.
- Actively participated in **Scrum** and **Agile** methodologies, collaborating in code reviews and pair programming sessions.
- Worked with **REST APIs**, service integration, and version control using **Git**.

QA Intern

Apr 2024 – Jun 2024

Sovos

- Developed comprehensive **E2E (End-to-End)** test suite from scratch using **Playwright** and **TypeScript**, covering critical user flows.
- Implemented **automated testing**, integration tests, and executed **manual QA** to ensure product quality.
- Documented test cases and bug reports using project management tools.

Projects

Internship Management System (UNT Thesis)

Selected by the university to modernize the administrative ecosystem. Developed **full-stack** solution with **React**, **TypeScript**, **ASP.NET**, **C#**, and **SQL**. Migrated legacy data and designed **REST APIs**.

Blue Cheetah Investment Platform

Web application for international logistics management and investment tracking. Stack: **React**, **JavaScript**, **REST API**, **SQL**. Live at: bluecheetahint.com

Multi-tenant Restaurant Management System

Multi-tenant web system for restaurant order management. Customers scan **QR codes** to view menus and place orders without registration; includes group orders (multiple diners at a table with shared code). Administrators manage products, tables, and orders in **real-time**. Stack: **React**, **TypeScript**, **NestJS**, **PostgreSQL**, **Socket.io**, **REST API**, **PWA**. Live at: sistema-restaurantes-frontend-ivnb.vercel.app

Agile Kanban Management System

Scalable task management application with **MVC architecture**, **C#**, **ASP.NET**, **MySQL**, and **REST APIs**. Implemented **CRUD** operations and authentication features.
