EDUCATION

Computer Engineering

National University of Tucumán

2021 – Mar 2026

GPA: 8.93/10. **#1 in Computer Engineering** and ranked 6th across the Faculty of Exact Sciences and Technology. **Completed 100% of coursework (43/43 courses)**. Dean's List honoree and selected as National Flag Bearer.

High School Diploma

Colegio Pablo Apóstol

2015 – 2020

Top of class for six consecutive years. **National Flag Bearer** for academic excellence.

SKILLS

Azure OpenAI | **Generative AI** | **Cursor AI** | **Devin** | **GitHub Copilot** | C# | TypeScript | JavaScript | React | SQL | ASP.NET | .NET | REST API | Azure | Azure DevOps | CI/CD | Git | Playwright | Python | MySQL | PostgreSQL | NestJS | Socket.io | PWA | HTML | CSS | Agile | Scrum

About

Software Engineer and Computer Engineering graduate from UNT with a **GPA of 8.93/10**, **ranking #1 in the program**. Graduated March 2026. **AI Integration Specialist**, focused on **generative AI**, automation with **Azure OpenAI**, and AI-assisted development. Advanced expertise in **generative AI tools** (Cursor, Devin, GitHub Copilot) to accelerate development and enhance code quality. **Full-stack development** with **React**, **TypeScript**, **C#**, **ASP.NET**, and **SQL**. Currently at **Sovos**, leading **AI automation initiatives**, creating **AI-powered PR Review pipelines**, and optimizing processes through **generative AI integrations**.

Experience

Software Engineer I

Oct 2024 – Present

Sovos

- **AI Integration Leader**: Designing and implementing solutions with **Azure OpenAI** for business process automation and productivity enhancement.
- **Generative AI Specialist**: Advanced use of **Cursor AI**, **Devin**, and **GitHub Copilot** to accelerate development, generate high-quality code, and optimize workflows.
- **AI-Powered Automation**: Created pipelines with **Devin** to automate **PR Review**, code analysis, and continuous quality improvement through **generative AI**.
- **AI-Enhanced CI/CD**: Implementing **CI/CD pipelines** with **Azure DevOps** that incorporate **AI** for automated dependency updates and deployment optimization.
- Developing **REST APIs** that integrate **Azure OpenAI** for intelligent data processing and automated decision-making.
- Building scalable **full-stack** solutions using **React**, **TypeScript**, **JavaScript**, **C#**, **ASP.NET**, and **SQL**.
- Designing and configuring **cloud infrastructure** on **Azure** across multiple environments (development, staging, production).
- Managing **SQL databases** and optimizing queries to improve application performance.

Software Development Intern

Jun 2024 – Oct 2024

Sovos

- Developed new features in **React** (frontend) and **C#/ASP.NET** (backend), leveraging **AI tools** to accelerate development and improve quality.
- Actively participated in **Scrum** and **Agile** methodologies, collaborating in code reviews and pair programming with **generative AI assistance**.
- Worked with **REST APIs**, service integration, and version control using **Git**.

QA Intern

Apr 2024 – Jun 2024

Sovos

- Developed comprehensive **E2E (End-to-End)** test suite from scratch using **Playwright** and **TypeScript**, covering critical user flows.
- Implemented **automated testing**, integration tests, and executed **manual QA** to ensure product quality.
- Documented test cases and bug reports using project management tools.

Projects

Internship Management System (UNT Thesis)

Selected by the university to modernize the administrative ecosystem. Developed **full-stack** solution with **React**, **TypeScript**, **ASP.NET**, **C#**, and **SQL**. Migrated legacy data and designed **REST APIs**.

Blue Cheetah Investment Platform

Web application for international logistics management and investment tracking. Stack: **React**, **JavaScript**, **REST API**, **SQL**. Live at: bluecheetahint.com

Multi-tenant Restaurant Management System

Multi-tenant web system for restaurant order management. Customers scan **QR codes** to view menus and place orders without registration; includes group orders (multiple diners at a table with shared code). Administrators manage products, tables, and orders in **real-time**. Stack: **React**, **TypeScript**, **NestJS**, **PostgreSQL**, **Socket.io**, **REST API**, **PWA**. Live at: sistema-restaurantes-frontend-ivnb.vercel.app

Agile Kanban Management System

Scalable task management application with **MVC architecture**, **C#**, **ASP.NET**, **MySQL**, and **REST APIs**. Implemented **CRUD** operations and authentication features.
